
Best HydraFacial Treatment in Indore

Advanced Skin Cleansing, Hydration & Instant Glow

AESTHEVA — INDORE

What is HydraFacial?

HydraFacial is a multi-step facial treatment that combines cleansing, exfoliation, extraction and hydration using vortex-fusion technology.

The treatment uses a specialized spiral tip to deliver comprehensive skin renewal. Aestheva customizes the treatment with targeted boosters according to individual skin concerns.

- **Remove Dead Skin Cells**
- **Cleanse Pores**
- **Extract Impurities**
- **Reduce Surface Oil & Congestion**
- **Infuse Hydrating Serums**
- **Support Smoother-Looking Skin**

How Does HydraFacial Work?

Four-Step Skin Rejuvenation Process

Gentle Exfoliation

Loosens impurities and improves skin texture.

Vortex Extraction

Automated suction clears blackheads and excess oil.

Vortex Cleansing

Removes surface impurities and dead skin cells.

Hydration & Infusion

Delivers hyaluronic acid, peptides, antioxidants.

This multi-step approach provides cleansing and hydration without traditional manual extraction.

Key Benefits of HydraFacial

Instant Glow

Instant-looking skin glow and fresh dewy appearance

Intense Hydration

Deep moisture infusion for dry and dehydrated skin

Deep Pore Cleansing

Improved appearance of enlarged pores and oil control

Smoother Texture

Removal of surface impurities and fine-line improvement

No Downtime

Suitable for sensitive and acne-prone skin types

Customized Treatment for Your Skin

HydraFacial can be customized using targeted boosters according to individual skin requirements.

1

Brightening

Vitamin C-based boosters for dull or uneven-looking skin

2

Hydrating

Hyaluronic acid-based hydration for dry and dehydrated skin

3

Acne Control

Salicylic acid-based options for congested or acne-prone skin

4

Anti-Aging

Targeted boosters to support skin rejuvenation and fine lines

Who Can Consider HydraFacial?

HydraFacial may be considered by people looking for:

- Dull or Tired-Looking Skin
- Dehydrated Skin
- Congested Pores & Blackheads
- Oily T-Zone
- Enlarged Pores
- Uneven Skin Texture
- Pre-Event Skin Preparation
- Regular Skin Maintenance

A skin assessment can help determine the most suitable HydraFacial protocol for your individual needs.

What Happens During a Session?

APPROX. 30–45 MINUTES

01

Skin Analysis

Skin type, congestion, hydration and specific concerns are evaluated.

02

Cleansing & Exfoliation

Vortex tip removes dead skin cells and surface impurities.

03

Acid Peel

Mild glycolic and salicylic acid combination loosens impurities.

04

Extraction

Vortex suction removes pore congestion without manual squeezing.

05

Hydration & Booster Infusion

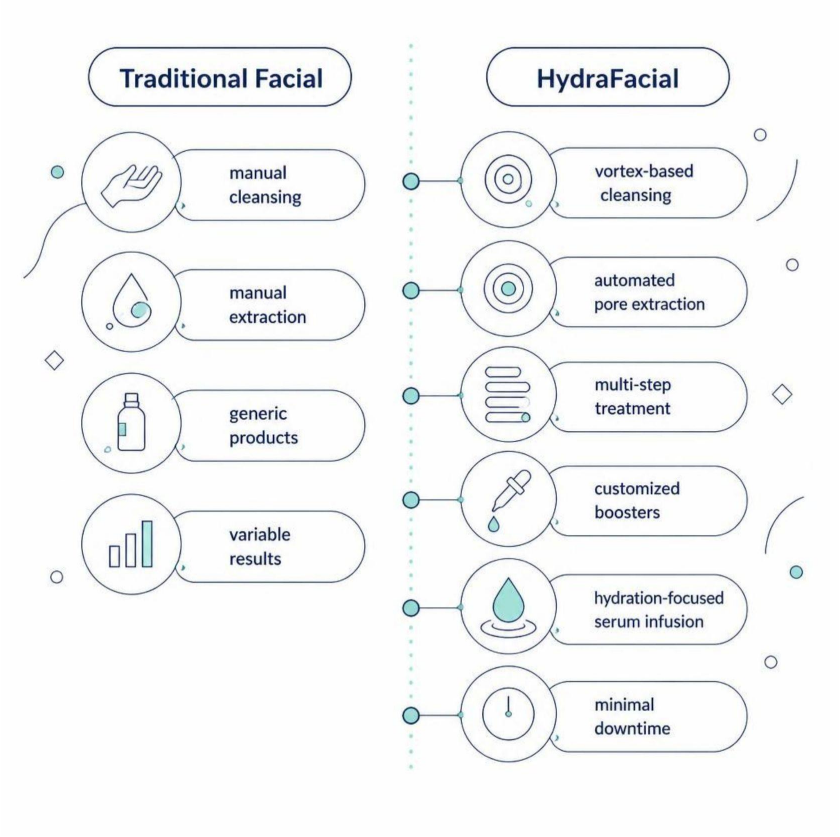
Hydrating ingredients and selected boosters are infused into the skin.

06

Final Protection

Optional LED light therapy and SPF application to conclude the session.

HydraFacial vs Traditional Facial



HydraFacial combines cleansing, exfoliation, extraction and hydration into a structured treatment protocol — delivering consistent, customizable results that traditional facials cannot replicate.

Vortex Technology
Automated, precise and gentle

Customized Boosters
Tailored to your skin concern

Minimal Downtime
Return to daily routine immediately
